

Ghislain Deffo

College Park, MD • <https://github.com/gnarus-g>

Empiricist software development professional with expertise in designing and maintaining full-stack systems, aiming to deliver high-quality software solutions and contribute to a culture of innovation and efficiency. Measurable contributor to Open Source tooling with over 10K downloads, and 50+ GitHub stars.

Employment

Full Stack Developer

Volute Technologies, Nov 2021 - Present

- **Led the development** of user experiences (Text, A/V, Media) to facilitate communications within discussion forums.
- Coordinated across teams, both internal and external, to build and integrate new subsystems concurrently
- Contributed to **strategizing** the feature development **roadmap**, alongside the Chief executives.
- Optimized application performance, **improving the Lighthouse score** from 17 to 82, achieving a speed index of 1.9
- Increased development velocity by moving from Create React App (CRA) v4 setup to Next.js 13, resulting in a **6x** reduction in build times.
- Sped up **GitHub Actions** build to detect and address issues quicker in the development process, from 12 min average to a **6 min** average
- **Identified** user friction and **inquiries** by **parsing questions** within posts in the forums using an **LLM** (GPT-3.5) and reporting them, to indirectly increase user interactions by 20%.
- **Revealed** business continuity gaps by developing Analytics widgets, using React, Recharts, Tailwind, Nodejs, and Azure Postgres Flexible Server.
- **Improved** system stability by implementing end-to-end type-safe wrappers for emitting and handling system events by Azure Event Grid, improving development and testing efforts by 30%
- **Led** efforts to migrate to Typescript, and change libraries and common practices to **improve maintainability**, eliminating severe bug reports from 1 per quarter to 0.
- Developed CLI tools and scripts, in Rust or Nodejs, to automate developer tasks, thus improving velocity by 25%
- **Ameliorated user engagement** by leveraging Large Language Models with the **RAG** strategy to provide the ideal experience for searching through forums.
- Maintained an **AKS** (Kubernetes cluster) hosted on **Azure**, resolving region migrations, investigating memory leaks, debugging Kubernetes deployments, etc...

Full Stack Developer

Project New Social LLC, Feb 2021 - Nov 2021

- **Designed and led** the development of a social media Progressive Web App to cheaply support **Mobile and Desktop devices from one code base** using Next.js, Node, Prisma, Postgres, and GraphQL
- Created and maintained a deployment strategy to serve our initial thousands of concurrent users for under 10 USD a month, using **Docker** containers run on a VPS with Docker Swarm
- Crafted reusable and **responsive UI** components using CSS, Typescript, React.js, and @material-ui to maximize on a reliable user experience
- Maintained a typescript **monorepo**, using Turborepo, to reduce deployment and developer onboarding times by 30%

Core Java Instructor

CollaboraIT Inc., Jul. 2020 - Oct. 2020

- Assisted the senior instructor in training cohorts of Java developers monthly, teaching core concepts and design patterns.
- Taught advanced Object and Component design concepts such as **threading**, **polymorphism**, interface design, and **SOLID** principles.
- Designed a curriculum, in tandem with other instructors to rapidly upskill junior developers to be ready for professional projects in just 8 weeks.

PROJECTS (Open Source)

[maccel](#)

Mouse acceleration **driver** and kernel module for **Linux** with a simple Terminal UI. [Expository Write-Up](#)

- *C, Rust, Astro, Typescript*

[rested](#)

Language/**Interpreter** for easily defining and running requests to an HTTP server with **language server** integrations. [Expository Write-Up](#)

- *Rust, REST, Lua, LSP*

[mynd](#)

A todo app, in the terminal; simple and Frictionless, with an optional GUI Desktop App.

- *Rust, Tauri, Svelte, Typescript*

[sciare](#)

CLI tool to manage documents, allowing for semantic searching, and prompting using the **RAG** strategy.

- *Rust, Ollama, SQLite, llama2*

[cnat](#)

A CLI tool to systematically **change** all the **class names** in your codebase. [Expository Write-Up](#)

- *Rust, Typescript, Tailwind*

Skills

Expert:

Typescript • Node.js • REST • React.js • Next.js • HTML & CSS

Proficient:

Rust • Cypher • Jest • Tailwind • Docker • GraphQL • MongoDB • Neo4j • Git • Github Actions • Linux

Familiar:

C • Lua • Bash • SQL • Svelte/SvelteKit • Turborepo • Neovim • Kubernetes • PostgreSQL • SQLite • Playwright • Cypress • Generative AI

Education

Montgomery College

General Studies, STEM - Associates

University of Maryland

Computer Engineering - Ongoing
